

2017-2018 Fifth Grade

Programs offered to all Meigs County Schools are FREE of charge. Programs range from 30-45 minutes and can be combined and modified. Contact Jenny Ridenour at the Meigs Soil and Water Conservation District at 992-4282 from 8a.m. to 4:30 p.m. jenny.ridenour@oh.nacdn.net to schedule a class presentation. Please schedule at least a week in advance.

This is not a complete list of programs. I will also develop a program to meet any environmental education need. If you don't see a program that you used before, it is still available.

Food Web/chain

Students construct a food web, starting with the sun and discuss how each plant and/or animal plays an important role within the food web.

Streams: sick or healthy? Soggy Socks

Stream Quality Monitoring is an excellent way for youth and adults to learn about the Macroinvertebrates that live in streams. It is an interactive learning experience which allows participants to study water quality and the importance of keeping our water resources clean. A local stream is used as we determine the water quality based on data collected. Populations of macro-invertebrates and the chemistry of the water are analyzed along with physical factors. Rubber slip on boots and nets are supplied. This activity is available in March, April, May, and June. If the students can't go to the stream, I will bring the stream to them in the classroom.
